

The Testra pD is an entry-level basic leak tester suitable for accurate and repeatable leak testing of small volume parts.

Available as a single-channel pressure decay leak tester with a test pressure range adjustable from 0-4 bar / 0-60 psi the Testra's small footprint makes it perfect as a bench top tester.

Easy to set up and simple to use, the Testra pD is ideal for users who want something more than a simple pressure gauge where data analysis and complex test sequences are not important.

Testra pD — perhaps the world's simplest attribute gauge.

### *Specifications*

**Test technique:** Pressure decay

**Pressure range:** 0-60 psi / 0-4 bar

**Number of channels:** One

**Program storage:** 99 programs, linkable

**Engineering units:** User selectable

**Language:** English only

**Communications:** RS232, PLC I/O

**Display:** LCD

**Regulator:** Manual

**Dimensions:** 9.5 x 8.5 x 13.75 inches  
238 x 216 x 350 mm

**Security:** Lockable programming switch
